TABLE 1. CLASSIFICATION OF 51 DESIGNS ACCORDING TO SECTION 3 IN THE PAPER, SORTED BY YEAR OF THE CITED PUBLICATION. STATUS INDICATES THE PUBLICATION TYPE: C = CONFERENCE, J = JOURNAL, WS = WORKSHOP, P = PREPRINT, R = REPORT, AND T = THESIS. UNDESIRABLE PROPERTIES ARE SHOWN IN RED.

	General info		System architecture							Assumptions and trust							Privacy				Compliance		Performance					Tech. features				
Year	Reference	Status	Global information	Integrity of global info.	Visibility of global info.	Communication for payment	Dist. system model	Synchrony model	Anonymous network	Security proof	Type of evidence	Trusted setup	Trusted hardware	Operation	Issuance	Privacy revocation	Identity privacy	Value privacy	User unlinkability	Sender anonymity	Privacy revocation	Limits	Impl. available	TVs	Latency	Type of benchmarks	Sequential payments	Growing global information	Off-ine payment	Exact amount	Unintended recipient	Design pattern
